SUMMARY

Experienced Front-end engineer with over 4 years in web development, skilled in React, Redux, MobX, and Next.js. Specializes in building complex, responsive SPAs and PWAs, improving existing features, and creating new functionality from scratch. Constantly expanding my knowledge, and looking for innovative projects to grow my expertise and bring more value to the product.

PROFESSIONAL EXPERIENCE

Frontend Engineer

Brightgrove

04/2022 - Present Kyiv, Ukraine

- Worked on a large-scale booking project in a scrum team of more than 20 people
- Effectively implemented new major features into existing code, while developing reusable and extendable components
- Mastered the art of code refactoring, while moving from Antd library to custom written components
- Made a seamless upgrade from the deprecated Moment.js library to Luxon, enhancing date management across the project
- Completed an Advanced TypeScript course, progressing from intermediate to advanced level and enhancing my skills in writing maintainable, clean code within the project
- Took proactive steps and effectively implemented complex functionalities

Frontend Engineer

AI Helps

03/2021 - 04/2022 Kyiv, Ukraine

- Worked on two React CRM projects and one SaaS product for US beauty market.
- Contributed effectively to a Scrum team of six employees as well as developed proficiency in creating and deploying two PWA applications independently, under the supervision of the team lead.
- Completed complex tasks related to Service workers, WebSockets, deploy to prod and apps internationalization in LinguiJS.

Frontend Engineer

KopiKupi

10/2020 - 03/2021 remote

- Successfully enhanced the development of the admin panel of a fintech project in React/Typescript, aligning with technical requirements within small teamExpanded the end-to-end test coverage of an admin panel using Cypress to ensure functionality and code quality.
- Provided TypeScript improvements and contributed to code reviews to maintain high standards.
